Description

The Pagero Online Portal is an open network which unites suppliers and their customers for the electronic data exchange of different document types. The open network offers the full range by roaming with other service providers, the PEPPOL infrastructure, government hubs and closed networks that work together with Pagero.

The Center of Excellence is the health sector, which enables suppliers to receive automatically corrected data in a touchless EDI workflow.

In this webinar, the participants get an insight into the digitization of order-2-cash processes in the health sector. The EDI infrastructure in such a project is addressed, as well as the possibilities that arise from an open and global network.

Target group

Industrial partner:
Specialists/Executives from the areas of Strategic and Purchasing, Controlling, Master Data Management, IT, Category Management, Supply Chain Management and Managing Directors.

Content

- Presentation of the Pagero infrastructure
- The open EDI network
- Added value and services
- Clearing on Process
- Invoice digitization and mandates
